RE	REMARKS				
1	:	P: Pass, F: Fail, DATA: No Evaluation, N/A: Not Applicable			
2	:	*The reported expanded uncertainty is based on the standard uncertainty multiplied by a coverage factor of			
		k=2, providing a level of confidence of approximately 95%. Unless otherwise is specified, the uncertainty of			
		measurement has not been taken into account when assessing pass/fail of the sample against the requirements			
		of the standard. In case consideration of measurement uncertainties when assessing pass/ fail limits, some			
		results may be in borderline. Information on uncertainty is contained in appendix A on this report.			
3	:	The test and/or measurement results, the uncertainties (if applicable) with confidence probability and test			
		methods are given on the following pages which are part of this report.

2	:	*The reported expanded uncertainty is based on the standard uncertainty multiplied by a coverage factor of
		k=2, providing a level of confidence of approximately 95%. Unless otherwise is specified, the uncertainty of
		measurement has not been taken into account when assessing pass/fail of the sample against the requirements
		of the standard. In case consideration of measurement uncertainties when assessing pass/ fail limits, some
		results may be in borderline. Information on uncertainty is contained in appendix A on this report.
3	:	The test and/or measurement results, the uncertainties (if applicable) with confidence probability and test
